TRADENET MESSAGE

18/11/2021 10:55 AM

Prepared by: CrimsonLogic Pte Ltd	For: Singapore Customs (SC)	Release Date 18/11/2021	Ver 4.1	Reference TRADENET	Document Id. TDS41-MDS-XML-COODEC-M
--------------------------------------	--------------------------------	----------------------------	------------	-----------------------	--

1. INTRODUCTION

This specification provides the definition of the Trade Declaration and Application of Certificate of Origin ie. COODEC message to be used in Extensible Markup Language (XML) between trading partners involved in administration, commerce and transport.

This document shall be used as a baseline for the interface software design and shall be agreed upon by representative from IE Singapore and CrimsonLogic Pte Ltd.

2. SCOPE

The document shall provide the following principles and details for the following:

- criteria for passing information from Traders, Freight Forwarders, Cargo Agents and Shipping Agents to IESGP, CA or Chambers.
- message format.

The segments, composite data elements, data elements and codes used in this document are based on the respective directories in the UN/EDIFACT D.09B Directory. Refer to references 5 to 16 for more details.

--------------------------------------	--------------------------------	----------------------------	------------	-----------------------	--

3. FIELD OF APPLICATION

The message specification provided in this document are intended for use for the exchange of information between the trading partners in international trade. This message may be applied for both national and international trade. It is based on universal practice and is not dependent on the type of business or industry.

3.1 Principles

This message incorporates the necessary trade, transport, statistical and Applicant/Declarant information on the application for Certificate of Origin and/or IESGP Outward Declaration. Provision has also been made for the inclusion of appropriate commercial information which may be accepted by Issuing Authorities in lieu of supporting documentation.

The design principles adopted allow for referencing one or more commercial documents pertaining to the same declaration and for the grouping of document lines into a single trade item. A trade item consists of the grouping of those documents lines having the same customs characteristics (eg. tariff number, declared use etc). The message correspondingly permits the use of single or multi-packaging concepts and their identification to a trade item.

6. MESSAGE FUNCTION

Transfer conditions for the TCODEC (COODEC) message are dependent on the Application Type. They are:

Code	Application Type	Transfer Conditions
COO	Application for Certificate of Origin only	To allow the Declarant to apply for the Certificate of Origin for export purposes.

Sender : Traders, Freight Forwarders, Air Cargo Agents, Shipping Agents, Declaring Agents

Logical Destinations : SC
(via TradeNet system)

Response message : TCODEC (COODCI) message (for Issuing Authorities to inform the Applicant/Declarant on their approval to the application for the Certificate of Origin. Refer to reference 2 for more details)

APERAK (STATUS) message (for Issuing Authorities to inform the Applicant/Declarant on the rejection of the application; refer to reference 3 for more details)

APERAK (ERRORM) message (for Issuing Authorities and TradeNet System to inform the Declarant on the errors found when processing the declaration message; refer to reference 4 for more details)
